AASHYA MADHAN

Chennai, Tamil Nadu, India | +91 7538847929 | aashya05@gmail.com | LinkedIn | GitHub

Summary

Computer Science Engineering student with a 9.41/10 CGPA and hands-on experience in full-stack web development and REST APIs. Built and deployed web applications using React.js, Node.js/Express, and MongoDB. Co-authored an IEEE conference paper on a hybrid deep learning framework achieving 91% prediction accuracy.

Technical Skills

Languages: Python, Java, JavaScript, SQL, HTML/CSS

Web & Backend: React.js, Node.js, Express.js, REST APIs, JWT Authentication

Databases & Tools: MongoDB, MySQL, Git, GitHub, Postman

CI/CD: GitHub Actions, CI/CD Workflows

Other: Agile/Scrum, OpenCV, Flask, PyMuPDF

Professional Experience

Full Stack Development Intern — Infosys Springboard **Sep 2025 – Nov 2025**

- Developed component-based React.js interfaces and integrated REST APIs end-to-end, reducing manual data-entry time by 30%.
- Worked across 2 Agile sprints using Git/GitHub, code reviews, and CI/CD workflows for version-controlled development.

Frontend Web Development Intern — IBM SkillsBuild (Edunet Foundation) **Aug 2025 – Sep 2025**

- Developed 5+ responsive web interfaces and optimized rendering performance, reducing page load time by 15%.
- Integrated 3 third-party REST APIs to support real-time data in production-facing features.

Projects

SafePulse — Personal Safety Web App GitHub | Live Demo

React.js, Node.js/Express, MongoDB, JWT, bcrypt, Geolocation API, Resend API *July 2026*

- Developed a full-stack personal safety application with secure user authentication, real-time location sharing, and emergency contact management.
- Implemented REST APIs and an emergency alert workflow using geolocation, server-side countdown logic, and email notifications to notify trusted contacts during emergencies.

PrepForge — AI-Powered Placement Preparation Platform GitHub | Live Demo

React.js, Node.js, REST APIs, MongoDB *July 2026*

- Built a full-stack placement preparation platform that organizes interview questions across multiple technical and non-technical domains.
- Developed a resume analysis and job-description matching system that evaluates candidate profiles against relevant skills and keywords to provide personalized feedback.

VerifAura AI — Document Forgery Detection System GitHub | Live Demo

Python, Flask, OpenCV, PyMuPDF, CNN *July 2026*

- Developed an AI-based document forgery detection system using computer vision and deep learning to analyze documents and identify potential manipulations.
- Built a Flask-based application supporting multiple document formats and integrated the trained CNN model for automated forgery detection and prediction.

Publication

A Hybrid TCN–TabTransformer Framework for Multi-Dataset Campus Placement Prediction

IEEE ICC-CNS — June 2026

- Co-authored an IEEE conference paper proposing a hybrid deep learning framework combining TCN, TabTransformer, and BiLSTM, achieving 91% prediction accuracy.

Education

SRM Institute of Science and Technology, Ramapuram **2023 – 2027**

B.Tech, Computer Science and Engineering — CGPA: 9.41/10 *Chennai, Tamil Nadu*

Certifications

Introduction to Machine Learning — NPTEL

Introduction to AI — Simplilearn

Full Stack Development — Infosys Springboard

Corporate Readiness & Professional Skills — Accenture
